

MASKED BUYER SAMPLE / VERSION 1

IT Modernisation Opportunities

Businesses with documented public mail-domain configuration gaps.

LONDON + LAGOS FORMAT

Business identity, contact details and evidence URLs are intentionally masked.

Who this pack is for

Managed IT, cloud, email-security and digital transformation providers

POINT-IN-TIME RESEARCH, NOT BUYER INTENT

Every finding is dated and must be re-checked before outreach. The pack does not guarantee replies, sales, budgets, urgency, traffic or revenue.

What qualifies

Two public configuration signals are required, including at least one primary signal. No private system is scanned.

VERSION 1 SIGNALS

01 **DMARC policy absent**

02 **SPF record absent**

03 **MTA-STS policy absent**

04 **Mail policy conflict**

05 **Public TLS configuration gap**

EVIDENCE BOUNDARY

Checks use licensed public business records and passive public pages or records. We do not log in, submit forms, bypass controls, test private systems or infer hidden commercial intent.

Masked record format

These examples show the evidence structure a buyer receives. Business names, direct contacts and evidence URLs are hidden in this sample.

Licence and remedy

Each pack is counted by unique organisation domain and licensed to the named buyer for internal business development. Publishing, sharing or reselling is prohibited. Every export carries a unique licence ID and order-linked fingerprint.

Replacement review covers materially incorrect identity, contact or qualifying evidence reported under the current terms. It does not cover outreach results or a business changing after the audit.

RESPONSIBLE OUTREACH REQUIRED

Re-check the finding, personalise the approach, identify yourself, respect opt-outs and follow applicable UK or Nigerian data and marketing rules.
